PORTFOLIO WEBSITE

sanor07.github.io/Portfolio

TECHNICAL SKILLS

Cybersecurity

SIEM, Sysmon, Threat Detection, Log Analysis, Incident Response, Threat Hunting, Vulnerability Assessment, Penetration Testing, Windows Event Logs, OWASP Top 10, Network Security

Tools & Platforms

Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit, VirusTotal, MXToolbox, VMware, Git

Programming

Python, Java, HTML5, CSS3, JavaScript, Flask

Databases & OS

MySQL, SQLite, Linux, Windows

CERTIFICATIONS

- TTU Cyber Security Professional
- Ethical Hacking (NPTEL)
- SQL Injection Attack (EC-Council)
- Cryptography & Network Security
- Responsive Web Design
- Google Analytics

EDUCATION

B.Tech (CSE)

SRCEM, Palwal
2024 – Present

Intermediate (Science)

Newton Academy
2022 – 2024

CORE COMPETENCIES

- Security Monitoring
- Threat Detection
- Incident Response
- Vulnerability Assessment
- Web Security
- OSINT
- Secure Coding

SANOWAR HUSSAIN

Cybersecurity Analyst | SOC Analyst | Web Developer

PROFESSIONAL SUMMARY

B.Tech CSE student with practical experience in security monitoring, threat detection, log analysis, vulnerability assessment, and secure web development. Hands-on experience building SIEM environments using Wazuh/Sysmon, investigating phishing, and conducting OSINT intelligence gathering. Proficient in Python, Linux, and standard security toolkits. Passionate about Security Operations, Threat Detection, Incident Response, and Blue Team methodologies, with a strong commitment to continuous learning and practical cybersecurity projects.

EXPERIENCE

Data Analyst Intern | GAOTEK Inc.

2025 – Present

- Cleaned and validated datasets using Python to improve reporting accuracy.
- Generated structured analytical reports to support operational decisions.
- Automated repetitive data validation tasks using Python scripting workflows.

Freelance Web Developer | Self-Employed

2023 – Present

- Designed and developed secure, responsive websites using HTML5, CSS3, and JavaScript.
- Applied secure coding principles, input validation, and web application security standards.
- Optimized website performance, responsiveness, and cross-browser compatibility while maintaining code through Git version control.

PROJECTS

SIEM Detection Lab | Wazuh | Sysmon | Kali Linux

- Deployed a centralized SIEM environment utilizing Wazuh and Sysmon agents.
- Analyzed Windows logs to generate alerts and built custom detection dashboards.
- Simulated attacks using Nmap to refine event monitoring and log correlation workflows.
- Configured security dashboards to monitor authentication events, endpoint activity, and system logs for proactive threat detection.
- github.com/sanor07/siem-detection-lab

Phishing Analysis & Incident Response | VirusTotal | MXToolbox

- Analyzed email headers, verified senders, and isolated Indicators of Compromise (IOCs).
- Compiled structured incident reports detailing threat impacts and containment actions.

ReconX – OSINT Framework | Python | CustomTkinter | APIs

- Developed a modular Python desktop framework to aggregate and automate OSINT gathering workflows.
- Designed a modular architecture to simplify integration of additional OSINT data sources.
- github.com/sanor07/reconx-osint-framework

College Management Portal | HTML | CSS | JS | MySQL

- Built an academic portal integrating granular Role-Based Access Control (RBAC) schemas.

Face Attendance System | Python | Flask | OpenCV | SQLite

- Integrated computer vision face recognition models into an automated administrative portal.

HOMELAB

Windows 11 | Ubuntu Server | Kali Linux

- Built and maintained a virtual cybersecurity lab using VMware.
- Configured Wazuh SIEM and Sysmon for endpoint security monitoring.
- Simulated reconnaissance activities using Nmap and analyzed security events.
- Practiced log analysis, threat detection, and incident investigation in a controlled environment.
